Cancer Care

World-Class Support
For Those Living With,
Recovering From,
Or Looking To Prevent Cancer.

Human Nature Natural Health
provides expert Naturopathic care
for patients with cancer
or those with an interest
in cancer prevention.

We welcome patients at every
stage of diagnosis and treatment.

Whether newly diagnosed,
currently receiving treatment,
in remission, or with advanced disease,

You can improve your
chances of survival and create
a healthy anti-cancer environment
during or after conventional treatments.

Cancer patients can improve
survival rates, ease symptoms,
and improve quality of life.

This integrated approach gives
cancer patients the best chance
at a healthy future.

An Individualized Approach
As Unique As You Are!SM

Naturopathic Oncology

Naturopathic Oncology is the application of naturopathic medicine to people living with cancer; it is an emerging discipline on the forefront of cancer medicine using natural methods for healing in conjunction with traditional medical treatments such as surgery, radiation and chemotherapy.

Also called Integrative Cancer Care, the goal of this blending of approaches is to enhance survival and quality of life.

The goal of Naturopathic Oncology is to create a healthy environment both inside and outside the body. Naturopathic medicine makes use of time-tested, scientifically grounded, natural methods to strengthen the body's ability to heal itself.

The Oncology Association of Naturopathic Physicians states that the role of the naturopathic doctor is to:

- Support normal metabolism during treatment
- Help decrease and manage side effects such as nausea, insomnia, dizziness, mouth sores, anemia, hot flashes, fatigue, and or neuropathy
- Boost your body's immune system after treatment to help prevent progression and recurrence.
- Provide strategies for long-term cancer prevention and health maintenance
 - Educate patients about complementary and alternative treatments
 - Communicate with other members of the treatment team
